Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to the application filed on 21 October 2003 in which claims 1-3 are pending.

Claim Objections

Claim 3 is objected to because of the following informalities: the applicant states that the volumes are connected to each "one" by a damper. The term "one" seems to be inappropriate. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nageno (U.S. Patent No. 5,844,998).

Regarding claim 1, Nageno teaches a headphones comprising: at least one headphone earpiece (figure 1-5C) having a housing (3); said earpiece (1) also having a reproduction system (11-15) and ear cushions (2), the latter enclosing the ear or lying on it, a front volume (area in front 53,54) and a rear volume (area behind 53,54) being determined by the reproduction system, the front volume being essentially the volume between the reproduction system and the volume enclosed by the ear cushions and the head (area in front 53,54) and the rear volume being

essentially the volume enclosed by the reproduction system (area behind 53,54); and an acoustic resistor (54) connecting the housing of the headphone earpiece and the front and the rear volumes; said acoustic resistor (54) being situated inside the housing of the headphones earpiece with respect to the front volume behind a plane which is determined by a sound outlet aperture (53) of the housing.

Regarding claims 2-3, Nageno teaches the acoustic resistor (54) is situated inside a channel inside the housing of the headphones earpiece next to the reproduction transducer system.
